**Proposed Marketing Incentive – Airport Passenger Service**

Deputy Clerk Frotten presented a request for decision on a proposed marketing incentive for airport passenger service at the Yarmouth Airport. He noted that the WREN and the Airport engaged Intervistas to do the data mining work on their behalf and that they recommended that the airport approach Air Canada with the information as they would be in the best position to offer the desired service. He explained that as part of the pitch to Air Canada, the advice received was that a community incentive is typical to encourage a service of this type.

He highlighted that incentives are typically twofold; marketing support (local community marketing) and reduced landing fees in the early part of the service to share the risk of a new start up service. He clarified that the Airport would be recommending a reduced fee, and that that portion would be approved by the Board and that Council approval is not required. He did emphasize however that Council approval would be required for any marketing dollars specifically used to support the restoration of passenger service.

He concluded that the amount was not confirmed yet but the CAO recommended that Council agreed that the nature of the investment is agreeable in principle, and that the amount would be determined at a future date.

It is moved by Lucien LeBlanc and seconded by Aldric d’Entremont to approve, in principle, a marketing and promotion incentive to support our case to restore scheduled passenger service to our area. The amount, once determined, shall be considered in budget deliberations of 2016-17.
