

Since we have been chatting on this ( as mentioned I did talk to Alain once)

I have put together a cost to create the landscape feature and sign.

Our budget is \$10,750.00 to cover excavation work to prep the area, then to install a rock wall which will be extended more ( than in the sketch) to the right side to compensate for the slope.

Install posts with caps plus the custom sign.

Then fill the inside with soil, plant shrubs and perennials , finally a cover of bark mulch.

Could this be brought to council's attention if they would consider a contribution toward the cost ?

merci
