As described in our email conversation please accept this as our official request.

Wanted to pass along the good news the we have been successful with our application for a generator from the province.

"I am pleased to tell you that your recent application for funding under the Community Generator Program has been approved. The Department of Communities, Culture, Tourism and Heritage will invest \$17,929 towards your generator project for the 2022- 2023 fiscal year."

When I submitted the application the quote from Irving Propane was not in yet so I put in a \$5,000.00 place-holder in the application. When Irving finally came they advised me that the place where we had planned to install the generator was not acceptable. The new place is in front of the old hall where the electrical mast is located. This meant that more has to be spent on the trench for the fuel line as it now is farther away from where the four 400 litre cylinders are to be placed and also we need to put at least five to six bollards in front of the 24Kw generator to protect it from vehicles. These new unforeseen expenditures (approximately \$2,500.00) will have to be absorbed by us as the project is an 80% / 20% split. We have indicated to the province that we were prepared to allocate \$4,482.21 as our share. I do realise that our community centre has recently be given \$10,000.00 for our floors and I was not going to request any further funds from the municipality as we had had our fair share. However, with these new expenditures and the fact that we are now a Comfort Centre, I would hope that you agree with me that the proper installation of this generator is a priority for our community and municipality. Therefore I am requesting that the municipality grant us \$2,500.00 to pay for the unforeseen expenses for the proper installation of our generator.

Thank you for your kind consideration of our request.

Regards,

P. Earl Muise, Treasurer
Club Social des Iles

PS. Guy has advised me that he is able to provide us with a \$500.00 Grant so the request is now \$2,000.00 during your 2023/2024 budget.

This inspection covers (propane/LP-gas) items and equipment visible and accessible to the service technician and represents the conditions existing on the date of inspection. It does not cover latent or manufacturing defects, the internal working of sealed equipment, or structural components, and cannot be construed to cover failure or unforeseen happenings.

- Know how to turn off the gas in case of emergency
- Have smelled propane and can detect its odor
- Have received the consumer safety information and material
- Had gas system deficiencies and/or corrections, if any, clearly explained to me
- Am satisfied with the service work performed

La présente inspection ne porte pas sur les dommages cachés ou les défauts de fabrication, sur le fonctionnement interne de l'équipement fermé ou sur les éléments structuraux et on ne peut pas considérer qu'elle protège contre les pannes ou les événements imprévisibles.

- Je sais comment couper le gaz en cas d'urgence
- Je connais l'odeur du propane pour pouvoir la détecter
- J'ai reçu les renseignements et la documentation sur la sécurité des consommateurs
- On m'a expliqué clairement les lacunes du circuit de gaz ou les corrections qui doivent y être apportées
- Je suis satisfait du travail d'entretien effectué
